DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-44, drawn to a power amplifier having transformer, classified in class 330, subclass 276.
- II. Claims 46-52, drawn to inductor devices, classified in class 336, subclass 10.

The inventions are distinct, each from the other because of the following reasons.

Inventions Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Group I has different effects, functions and mode of operation with respect to Group II.

The device as claimed in Group I related to an amplifier and in particular a distributed type amplifier having transformer and Group II related particularly inductor sizes.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2817

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
